## AVANT-PROPOS

Le Deuxième Recensement Général de la Population et de l'Habitat (RGPH2) a été institué par le Décret n° 408/PR/MPED/2000 du 11 septembre 2000. En fait, les Nations Unies recommandent aux gouvernements de réaliser un recensement démographique tous les dix (10) ans. Mais, faute de moyens et parfois aussi à cause de l'instabilité politique, beaucoup de pays africains n'arrivent pas à respecter cette périodicité. C'est le cas du Tchad dont le premier recensement démographique remonte à 1993.

L'exécution de cette opération répond au souci du Gouvernement, des partenaires au développement et des acteurs politiques, économiques et sociaux de disposer, tant au niveau national que régional, d'indicateurs fiables et à jour pour l'élaboration, le suivi et l'évaluation des politiques et programmes de développement économique et social menés dans notre pays pour l'amélioration des conditions de vie de la population.

Après les travaux préparatoires, le dénombrement s'est déroulé du 20 mai au 30 juin 2009 sur l'ensemble du territoire national. Les travaux se sont déroulés de manière satisfaisante malgré quelques difficultés conjoncturelles rencontrées au cours de la préparation et de l'exécution de l'opération.

L'organisation d'un recensement général de la population et de l'habitat est une opération extrêmement complexe, lourde et coûteuse, surtout dans un pays aussi étendu que le Tchad. Sa réussite nécessite non seulement des moyens logistiques, matériels et humains considérables, mais la collaboration de toutes les forces vives de la nation et la participation de l'ensemble de la population. Tel fut le cas de notre Deuxième Recensement Général de la Population et de l'Habitat (RGPH2), et ce d'autant plus qu'il a été programmé dans un contexte national particulier marqué par un certain nombre de contraintes et de difficultés, y compris d'ordre sécuritaire (attaque par les rebelles de la ville de N'Djaména en février 2008 et de l'Est du pays en mai 2009), qui ont fait de sa réalisation un grand défi. La plupart de ces difficultés ont pu, heureusement, être surmontées grâce notamment à :

- ✚ La volonté et le soutien sans faille du Gouvernement et des Plus Hautes Autorités du pays et en particulier l'engagement du Chef de l'Etat, Son Excellence le Président IDRIS DEBY ITNO, qui a permis la mobilisation des moyens nécessaires pour le bon déroulement de l'opération en ordonnant la prise en charge sur les ressources nationales jusqu'à 65 % du budget total du RGPH2, chose rare en Afrique dans le cas des opérations similaires
- ✚ L'appui déterminant des Partenaires Techniques et Financiers qui ont apporté les 35 % restants du budget
- ✚ L'Armée de l'air tchadienne qui a assuré la logistique pour le transport des Agents et des Questionnaires vers certaines zones d'accès difficiles
- ✚ La forte implication des acteurs politiques (tant de la majorité présidentielle que de l'opposition démocratique) qui avaient convenu que la réalisation du RGPH2 soit une activité prioritaire devant permettre l'approfondissement du processus démocratique dans notre pays tel que convenu dans l'accord du 13 août 2007

- ✦ Le consensus national formé autour de l'opération qui a consolidé une sensibilisation de proximité par l'ensemble des acteurs politiques et sociaux et qui a facilité l'adhésion et la participation de l'ensemble de la population

Les résultats préliminaires qui ont été publiés en septembre 2009, trois mois après le dénombrement, et qui n'étaient que provisoires, répondaient au souci du Gouvernement de mettre très rapidement des résultats globaux à la disposition des utilisateurs dont l'Institution en charge des questions électorales (la CENI), en attendant les résultats définitifs qui donnent plus de détails sur les caractéristiques démographiques et socio-économiques de la population. Les rapports, objets de la présente publication, résultent des travaux d'exploitation de l'ensemble des informations collectées ainsi que de traitement, d'évaluation et de validation des données, et rendent désormais caduques les résultats contenus dans le rapport préliminaire intitulé « Résultats Globaux » publié en septembre 2009.

J'exhorte les services publics, les partenaires au développement, les ONG et tous les acteurs sociaux, économiques et politiques, à une utilisation bénéfique de ces données pour le plus grand intérêt du pays.

Je voudrais saisir cette opportunité pour exprimer, au nom du Gouvernement de Son Excellence le Président IDRISSE DEBY ITNO, toute notre gratitude à tous nos partenaires nationaux et internationaux dont la contribution matérielle, technique et financière a permis la réussite de cette importante opération.

Je tiens à remercier particulièrement le Fonds des Nations Unies pour la Population (UNFPA) (qui nous a appuyés de bout en bout à toutes les phases de l'opération), l'Union Européenne (UE), la Coopération Suisse, la Coopération française, les Etats Unis d'Amérique (USA), le Programme des Nations Unies pour le Développement (PNUD), le Fonds des Nations Unies pour l'Enfance (UNICEF) ainsi que les consultants nationaux et internationaux qui ont apporté leur appui financier et/ou technique.

Je tiens également à féliciter la Direction Générale et tout le personnel de l'INSEED ainsi que le personnel temporaire dont l'engagement sans faille a permis la bonne réalisation de l'opération.

Enfin, je rends hommage à toutes les personnes qui ont contribué aux différentes étapes de l'opération et qui ne sont plus de ce monde.

LE MINISTRE DU PLAN, DE L'ECONOMIE ET  
DE LA COOPERATION INTERNATIONALE

BEDOUMRA KORDJE

# INTRODUCTION

Le souci du Gouvernement est d'assurer le bien-être des populations en construisant des hôpitaux, des routes, des écoles, en creusant des forages pour l'eau potable, etc. Or, pour bien orienter ses décisions et ses choix, pour planifier, élaborer et mettre en œuvre des programmes de développement efficaces et pouvoir évaluer les progrès accomplis, il a besoin de disposer des informations statistiques détaillées sur la population du pays. Ces informations doivent être fournies par le Deuxième Recensement Général de la Population et de l'Habitat (RGPH2).

Ce recensement a en effet pour objectif global de permettre une meilleure connaissance de la situation démographique du pays et de sa dynamique afin de favoriser l'intégration des variables démographiques dans la gestion de l'économie et du développement du Tchad et plus spécifiquement de :

- Déterminer l'effectif de la population totale du Tchad, sa structure par sexe et par âge selon certaines caractéristiques socioéconomiques et culturelles, sa répartition spatiale selon les différentes circonscriptions administratives et le milieu de résidence;
- Contribuer au renforcement du processus démocratique en facilitant notamment la planification et l'organisation du recensement électoral;
- Déterminer les niveaux, structures et tendances de la fécondité, de la nuptialité, de la mortalité et de la migration ;
- Evaluer l'évolution récente et future de la population ;
- Déterminer les caractéristiques des ménages, de l'habitat et du cadre de vie de la population ;
- Actualiser le fichier des localités et constituer une base de données sociodémographiques ;
- Actualiser la base de sondage ;
- Promouvoir l'utilisation des données et des résultats du recensement ;
- Fournir des indicateurs pour le plaidoyer en faveur de la femme et de l'enfant tchadiens.

Compte tenu des besoins pressants des utilisateurs, une exploitation rapide des tableaux récapitulatifs des questionnaires avait permis de disposer des résultats provisoires publiés en septembre 2009 sous le titre « Résultats Globaux ». Le présent rapport fournit les résultats définitifs issus de l'exploitation et du traitement de l'ensemble des données contenues dans les questionnaires. Il sera suivi par de nombreux autres rapports et documents fournissant des résultats plus détaillés et désagrégés afin de répondre au mieux aux besoins des utilisateurs et d'atteindre pleinement les objectifs spécifiques assignés au RGPH2 rappelés ci-dessus.

Il va de soi que ce rapport rend désormais caduque le rapport sur les « Résultats Globaux » publié en septembre 2009 et constitue, avec les autres rapports définitifs qui suivront, les seuls documents de référence sur les résultats du RGPH2.

Les données portent sur la population de droit, dite population résidente (résidents présents et résidents absents).

Ce rapport sur les « Résultats Définitifs par Sous-Préfecture » fait suite et complète le rapport sur les « Résultats Définitifs par Région et Département » qui présente une vue d'ensemble sur les résultats définitifs, au niveau national, régional et départemental, ainsi que le contexte de réalisation du RGPH2 et les aspects méthodologiques.

Il comporte 15 tableaux portant sur : (i) la population totale par sexe (population recensée et population estimée des zones inaccessibles des régions de Sila et de Tibesti : Tableaux 01 et 02) ; (ii) la population totale recensée par sexe (Tableau 03) ; (iii) la population totale recensée par mode de vie (nomade/sédentaire) ; (iv) les ménages ordinaires recensés et leur population par sexe (Tableaux 05 et 06) ; (v) la population totale recensée des groupes sociaux d'âge spécifique (enfants, jeunes, femmes en âge de procréer, population d'âge scolaire, population tchadienne d'âge électoral, population des personnes âgées : Tableaux 07 à 15).
